

## Scottoiler: Triumph TT 600 Y2K

### Scottoiler vSystem Installation Guide

Note: This install requires the special [Triumph T-Piece with Viton](#) (SA-0155), available free of charge from Scottoiler.

Note: Take care not to foul the throttle mechanism positioning T-Piece or routing vacuum tubing, ensure throttle can operate throughout full range before riding the bike.

Locate the vacuum – there is a corrugated vacuum pipe from a spigot on the throttle bodies. Cut into this pipe and insert the cut ends into either end of the special [Triumph T-Piece with Viton](#), available free of charge from Scottoiler. Then press the Damper Elbow, part number 4, onto the third leg of the tee. For further information see our easy step installation guide - [Vacuum Connections, General](#).

See picture below left

The RMV can be mounted under the seat. The more vertical the RMV the better and remember to avoid exhaust and engine components. For further information, see our easy step installation guide – [Reservoir Positions, General](#).

See third picture

The delivery tubing can be routed along the swingarm using conduit and glue or self adhesive cable clips and the dispenser can be secured on the rear spindle using a Dispenser plate & Clip. For further information see our easy step installation guide - [Dispenser Assemblies, General](#). The nib should feed the rear sprocket between the 6 & 7 o'clock positions, with the cut face outwards.

See picture bottom left

Once fitted, [fill and prime](#) the system and set the adjuster knob to 'prime'. Start the engine and turn the adjuster knob until a flow of between 1 and 2 drops per minute is achieved. Check the condition of your chain after a ride, and then adjust as required.

For best results clean your chain before fitting the Scottoiler using paraffin or similar. Then lightly oil the chain from the bottle using a rag or a brush, this allows the oil from the Scottoiler to reach both sides of the chain. 1 to 2 drops per minute will maintain this film of oil on the chain.

If you have any further comments or queries, and are unable to resolve them using our website, please do not hesitate to call technical on 0141 955 1100 or email [technical@scottoiler.com](mailto:technical@scottoiler.com) for assistance. Thank you.
